### **Funded Research**

Title, PI, role if not PI, source, amount of funding

1999	Co-Principal Investigator, Stanley Foundation Research Program. "A 3-month acute, then 9-month follow-up study of the efficacy/effectiveness of clozapine vs. quetiapine in patients with treatment resistant schizophrenia that have failed risperidone or olanzapine. Direct costs: \$75,000 each year, for two years.
1999	Co-Principal Investigator, Janssen Pharmaceutica. "Cost-effectiveness of risperidone vs. olanzapine: Comparison at 5 VA sites". Direct costs: \$163,000.
2000	Co-Principal Investigator, Zeneca Pharmaceuticals. "An open-label study examining the sexual side effects of quetiapine vs. olanzapine and risperidone. Direct costs: \$7500.
2001	Co-Principal Investigator, "Antipsychotic-associated sexual side effects: Frequency and relationship to treatment and life satisfaction." Investigator initiated.

### **Other Research**

1997	Doctoral Dissertation "Identity Construction in the Interview Narratives of Self-Abusive Women." The qualitative methodology of narrative analysis was used for data analysis.
1988	Designed and implemented a quasi experimental pilot study partially funded by the Florida Alzheimer's Disease Initiative, replicating the Robert Wood Johnson experimental study on the impact of specific nursing interventions on adults with Alzheimer's Disease in a local adult day care center. (Video produced)

- 1988 Assisted in the design and implementation of a pretest-posttest control group design study funded by the Robert Wood Johnson Foundation, in conjunction with Dr. Ruth Tappen from the University of Miami School of Nursing. This research focused on the impact of specific nursing interventions on the functional ability of residents in a nursing home with Alzheimer's Disease.
- 1984 Completed a master's thesis entitled, "The Effect of an Informal Social Support Program on Self-Care Behaviors and Compliance in Older Adults with Hypertension". This thesis used a pretest-posttest control group experimental design involving the impact of a psycho-educational group on blood pressure, knowledge and compliance.
