H. Kenneth Dillon, PhD, CIH
3rd Annual Memorial Lecture Nominee

In recognition of Dr. Dillon, an esteemed scholar and mentor that Dr. Dillon, the Alabama American Industrial Hygiene Association (AL AIHA), in collaboration with the UAB School of Public Health, Industrial Hygiene Faculty, is seeking nominations for the annual *H. Kenneth Dillon Memorial Lecture*.

The AL AIHA is seeking nominees who carry the same passion for the industrial hygiene profession and research. Also the nominee should not only give to the profession through their employer but also devote time to serve others.

The award recipient is determined by committee members appointed by the AL AIHA Executive Committee and faculty from the UAB School of Public Health, Industrial Hygiene Program. The committee works together to select someone that emulates the intelligent and caring characteristics of H. Kenneth Dillon. **Please forward nominations by December 21, 2009 to Bonnie Jenkins at bonnie.Jenkins@ge.com or Bonnie Jenkins, General Electric, 2328 Point Mallard Drive, Decatur, AL 35601.**

2007 Honoree: L. Faye Grimsley, PhD, CIH – Tulane University School of Public Health and Tropical Medicine
2008 Honoree: Gene Saywell, CIH – EHS Manager for General Electric Appliances, Retired

About Dr. H. Kenneth Dillion, PhD, CIH
Dr. Dillon began his professional career in 1973 at Southern Research Institute in Birmingham, AL. In 1982, he joined UAB's School of Public Health Department of Environmental Health Sciences. He brought his expertise and enthusiasm for chemistry and calculus to the Industrial Hygiene Program. During his 22 years at UAB, he taught courses in environmental chemistry, air sampling and analysis, as well as others. He served as advisor (*in more ways than research!*) to many master and doctoral level students. He was a respected colleague, friend and lunch partner to fellow faculty members who recall his passion for his research and love of teaching. Dr. Dillon, an AL AIHA member and AIHA Fellow, was passionate about his research in industrial hygiene and particularly in his efforts to make healthier homes for underserved families.
