Henry Robertson receives UAB Center for Aging Scholarship, “Toward a New Paradigm of Estimating Longevity”.

August 5, 2010

Henry Robertson, PhD candidate in Biostatistics at the University of Alabama at Birmingham (UAB), has been awarded $2,000 scholarship grant from the UAB Center for Aging. This scholarship will fund his research on predicting longevities in large population-based studies with genetic marker data as the capstone paper of his PhD dissertation.

Henry will present his results at the Center for Aging and Birmingham/Atlanta VA GRECC Scientific Seminar Series.
