Ana Inés Vázquez, PhD promoted to Assistant Professor

October 17, 2012

Congratulations to Dr. Ana Inés Vázquez, who has been promoted to the rank of Assistant Professor. Dr. Vázquez joined SSG in 2010 as a Statistician, and then became a Postdoctoral fellow in 2011 under the mentorship of Drs. David B. Allison & Nengjun Yi. Dr. Vázquez received her MS and PhD, as well as a Certificate in Bioinformatics, at the University of Wisconsin-Madison. Her research interest includes focusing on (a) the development and use of genomic-based statistical methods for human health complex traits, including cancer, obesity and heart health traits in a Bayesian context; (b) the incorporation of biological information in models used for the analysis of microarray gene expression data. Her previous research included studies with generalized linear mixed models (GLMM) with correlated random effects, from which she co-authored an R-package that fits such models. Welcome aboard Dr. Vázquez.
