Matthew Loop – a winner of the 2012 SOPH Delta Omega Poster Session

April 5, 2012

One of our predoctoral students, Matthew Loop was declared a winner of the 2012 UAB SOPH Delta Omega Poster Session. Matthew was classified Rank 2 for his poster: “Air particulate matter and cognitive decline: a prospective cohort study.” A total of ten abstracts were submitted for 2012 Delta Omega Competition. The abstracts were assigned to faculty based on topic and focus area. Each abstract was then separately evaluated by two faculty members and an average score for each was calculated. Again, congratulations to Matthew Loop on his excellent work.
